

PROJECT PROFILE

PROJECT VISION

To complete the ultra-contemporary design of their latest restaurant spaces, Chipotle chose the sleek, milled finish of our Gemstone® units in a rich charcoal gray, giving the envelope a dramatic look that customers notice.

Gemstone® CMU

The natural aggregates in our Gemstone units are brought forth by grinding the face of the unit to a smooth “burnished” finish; a sealer is then applied to give the block an added sheen and to assist in the resistance to natural elements that can affect the surface.
