

## PROJECT PROFILE

### PROJECT VISION

Advance Auto wanted a brick facade for this property, but needed a fast-track schedule to get occupancy quickly.

By utilizing Master-Brik® structural concrete brick units, they eliminated the need for block back-up walls, shaving valuable time off of their schedule.

### Master-Brik®

These structural brick units can be used for load-bearing walls, eliminating the need for CMU back-up walls, saving time and money on your project. Perfect for retail and chain store projects, where client budgets and project timetables are tight.
