

PROJECT PROFILE

PROJECT VISION

This elementary school featured a custom twin-tone gray Split Face unit around the base of the building, giving it the look of limestone. A beveled sill transitioned the gray Split Face units from the tan “ribbed” units used in the upper portion of the building.

Split Face CMU

Split Face is a popular unit masonry finish because it offers a uniquely textured face with no two units appearing exactly alike. Providing depth to building design, Split Face is a cost-effective design option for any project.
