

PROJECT PROFILE

PROJECT VISION

The architect featured our Titan Series® units as a knee wall around the base of this facility, including the support columns for an entry portico. A matching sill unit was used to transition these oversized masonry units into the brick facade. The whole project was tied together with matching mortar.

Titan Series® CMU

For projects where a larger-scale masonry unit is needed, our Titan Series® veneer units are designed specifically to meet those needs. Titan Series® units are also useful for columns and piers, and for providing a stout accent detail.
