

Temple Stone® was designed to deliver a modern interpretation of Jerusalem Limestone that articulates an aged appearance, while providing the precision of modern manufacturing.

This finish works well for educational institutions, museums, lobbies, theme parks, municipal and recreational facilities.

Temple Stone® masonry units conform to ASTM C90 standard specification for loadbearing units and can be used as a single-wythe wall or as a veneer. Additionally, all units contain integral water repellent for moisture and efflorescence control.

Production capabilities include all typical CMU sizes and shapes including:

- 4x8x16, 6x8x16, 8x8x16, 10x8x16 and 12x8x16 in hollow and solid units.
- Specialty shapes such as bond beams, sills, insulated units, accoustical units, etc.

For further information, please refer to the latest version of ASTM C 90, contact your YBP representative, or contact YBP's Customer Care at sales@yorkbuilding.com or 800.673.2408.
