COURSE DESCRIPTION

This presentation identifies the performance characteristics of concrete masonry wall systems and compares available unit design options for form and function and how mortar tooling and bond patterns enhance the performance and the aesthetics of design, and concludes with examples of how these design elements have been incorporated into completed, award winning projects.

LEARNING OBJECTIVES

1. Identify the performance characteristics of concrete masonry wall systems.
2. Compare available unit design options for form and function.
3. Learn how mortar tooling and bond patterns enhance the performance and the aesthetics of design.
4. Review examples of how these design elements have been incorporated into completed, award winning projects.
