## COURSE DESCRIPTION

This presentation covers a basic overview of concrete masonry systems and materials; including how concrete masonry units are manufactured, masonry terminology, masonry mortars, masonry grouts, and construction practices and requirements.

## LEARNING OBJECTIVES

1. Discover the different types of manufactured concrete products and the process by which they are produced.
2. Review masonry-specific terminology and definitions; including code-specific terms as well as regional nomenclature.
3. Identify standards covering manufactured concrete products and the relevant physical requirements stipulated within these standards.
4. Describe products and materials used in the construction of concrete masonry systems, including reinforcing steel, grout, and mortar; and the relevant code provisions covering these materials.
