Project Profile Series

PROJECT VISION

To complete the ultra-contemporary design of this restaurant location, Chipotle's arcihitects chose the sleek, milled finish of our Gemstone® units in a rich charcoal gray, giving the envelope dramatic curb appeal that customers notice.

The evening sun reflects off the shiny finish, delivering a warm, inviting glow to the structure.

Gemstone® CMU

The natural aggregates in our Gemstone units are revealed through a grinding process that creates a smooth, burnished finish. A protective sealer is then applied to enhance the sheen and help resist environmental effects on the surface.
