

Project Profile Series

PROJECT VISION

Gemstone CMU provides an enduring and attractive means for lining high-traffic corridors.

With its smooth, glossy finish, it holds up to use and abuse while being easy to maintain.

Using our Ash color in Gemstone for the lower half of the hallways delivered a bold “foundation” appearance next to the white CMU upper portion of the corridors.

Gemstone® CMU

The natural aggregates in our Gemstone units are revealed through a grinding process that creates a smooth, burnished finish. A protective sealer is then applied to enhance the sheen and help resist environmental effects on the surface.
