COMMERCIAL HARDSCAPE PRODUCTS

ROSETTA®

The Rosetta® portfolio of products accurately recreates the look and feel of a natural setting for your project.

Rosetta products are produced by York Building Products using wet-cast concrete with integral color, giving them the most natural, multi-toned appearance on the market today. What sets Rosetta apart is the richness of shapes found in each collection. Rosetta products are modeled after natural stones.

Rosetta products are engineered to exacting specifications that ensure your project will stand the test of time. Technical resources for Rosetta products are available at:

Outcropping™ Wall

The large dimensions of the Rosetta® Outcropping units allow you to create grand structural walls in a scale that is both believable and inspiring. The Outcropping collection was designed with 12 unique size units and 24 unique stone textures to create the most natural appearance possible.

Fully-engineered to exacting specifications, the Outcropping collection is not limited by the inconsistent properties of natural stone, yet maintains its appearance and feel. Given its large size, Outcropping is designed to be machine-laid, making installation fast and easy.

Grand Ledge™ Wall

Grand Ledge units provide the texture of snapped limestone with a crisp, contemporary line at a grand scale--with the benefit of engineered efficiencies to make installation easier. The blocks are 12 inches tall and come in lengths of 3, 4, 5, and 6 feet long. The unit depths help create a consistent 2-¼ inch setback, and the 7-1/2 degree taper from the face allows for subtle curves. Grand Ledge 4-sided blocks can be used for corners, top blocks or freestanding applications.
