

Project Profile Series

PROJECT VISION

This large, stick-built apartment complex needed a stabilizing feature built into its appearance, and Temple Stone fit the bill.

Charcoal was the chosen color, as it offset the monolithic mustard color of the vinyl siding. And with Temple Stone's unique textured finish, it brought a distinctive textural look to the structure.

Temple Stone® CMU

A textured unit designed to deliver the appearance of Jerusalem Limestone. With a smooth, yet craggy face, it is perfect for both interior and exterior applications.
