

THIRTY-TWO™ Masonry Unit

For large projects where scheduling is tight, our Thirty-Two™ unit is the perfect block for the job.

Essentially, it is a 32"-long block unit with a center score, providing the appearance of two 16"-long units. However, in laying the equivalent of two units at once, it significantly reduces production time on the wall. The larger the project, the more time savings!

The units are palletized with a mix of "double pier end" units, and "one sash/one pier end" units. All units have a 3/8" score centered on both faces. The block was engineered to be used with a masonry hoist system, such as the "Mule" (see below).

8x8x32 Single Unit,
Double-Score CMU

GAIN EVEN MORE EFFICIENCY... USE THE MULE™.

The MULE™ does the heavy lifting, so you don't have to. The MULE™ is a new and innovative construction tool, designed specifically for the block-laying mason and the retaining wall contractor. The MULE™ assists the installer by effectively eliminating the weight of any CMU or retaining wall block up to 135 lbs.
