Gemstone®

GROUND FACE CMU

The natural aggregates in our Gemstone units are brought forth by grinding the face of the unit to a smooth “burnished” finish. Gemstone units are used in both internal and external building applications and are available in veneer or load-bearing sizes.

There are many standard sizes and shapes to select from and a variety of colors that show the natural beauty of the aggregate. Gemstone units conform to ASTM C 90 standard specification for load-bearing concrete masonry units.

BIM – Revit® Design Files:

We provide Revit® design files for our common unit shapes & sizes, including the family of finishes and colors– by shape. They are free to download from our website.

QUICK-SHIP COLORS & SHAPES

* The six colors shown in bold are stocked in 4x8x16 solid, and 8x8x16 hollow stretchers. They are all ground to order for a faster turn-around time. Ends can be ground to make corners, and the 4" unit can be beveled for sill applications. Matching mortars in Type N and S are also stocked to provide a turn-key solution.
