Temple Stone™

JERUSALEM LIMESTONE, REIMAGINED

A modern interpretation of Jerusalem limestone that articulates an aged, weather-worn appearance while providing the precision of modern manufacturing.

The face of Temple Stone units provides a concave craggy appearance, making it perfect for interior applications where a smooth touch is important.

Temple Stone™ is a great design choice for educational institutions, museums, lobbies, theme parks, municipal and recreational facilities.

The six colors shown in bold are stocked in 4x8x16 solid, and 8x8x16 hollow stretchers. They are finished to-order for a faster turn-around time. Ends can be finished to make corners, and the 4" unit can be beveled for sill applications. Matching mortars in Type N and S are also stocked to provide a turn-key solution.
